**The Animal Coat Harness**

The animal coat harness is designed to protect against cool or inclement weather while adding the benefits of a pet friendly harness. The animal coat harness can be used with or without a collar, and provides control of your pet without choking.

There are many coats and sweaters on the market designed to provide warmth but they fail to work appropriately with a harness or lead and they do not allow the dog to relieve itself without soiling the garment. The HarnessCoat is designed with a harness built into the coat, and allows clear passage so that the dog can relieve himself without soiling the garment. The HarnessCoat is also open underneath to prevent the dog from overheating and does not cover the scent gland behind their front leg. Covering of the scent gland is why many dogs resist wearing sweaters or coats that cover their underside.

Two simple clips and your dog is ready to go. Sewn in such a manner as not to cause rubbing or chaffing. The Harness Coat is warm, lightweight and comfortable for the animal, while providing a ring for quick hook up and release of a leash by the caregiver.

This coat is designed to be used while the animal is with the caregiver. It is not intended that the animal be left alone or exposed to the elements for extended periods of time.

\* Item must be returned within 15 days of receipt, along with original sales receipt, and explanation of problem so we can resolve matter.

***“The Coat with the Built in Harness”***  
**A Smart Choice**  
**YOUR DOG WILL LOVE IT !**
